

Regional Profiles of the Pacific Northwest Comparison Visual

Task: Create a visual understanding and comparison of two regions of Washington State.

Required for each region:

- Title of Region
- Descriptions and analysis of the natural environment of your chosen regions
 - 4 required: soil, climate, one (1) physical feature, major industry of the region
 - 4 optional (you choose): plants, animals, natural resources, monuments, etc.
 - You may NOT do 4 of the same thing (i.e. 4 different animals)
- **ONE** visual required for **EACH** of the above topics
- Clear and concise analysis or description must be written next to **EACH** visual
- Discussion of Rainshadow Effect on **EACH** region

Content Recommendations:

- Use class textbook (Chapter 2) to gather relevant information – START HERE!
- Web searches for supplemental information on specific regions
- Personal connections for supplemental information

Visuals/Diagrams/Charts:

- Search textbook to find appropriate visuals on region
- Web searches for flow charts, feedback loops, etc.
- Create your own based on textbook/web searches
- Visuals may be printed or hand-drawn

Both regions will be represented on the same poster!

Due Friday, February 14th – end of class period
